March 21, 2023

Dear Biola Community Residents,

Due to the recent storms our community has endured, this letter serves to inform the public of the protocols Biola Community Services District (“District”) follows as a Special District. The possibility of severe weather may exist at any time. In regard to the National Weather Services alerts, the District is not responsible for severe rain, flooding, or heavy wind damages. At any time, if a resident has a life-threatening emergency, they should call (911), for a non-threatening emergency call the Fresno County Sheriff’s Department at (559) 488-311, or (211) for any flooding. To be prepared for possible flooding, a sandbag location has been provided at the Biola County Yard located 12855 West “G” street. If an extreme number of sandbags are needed, please contact the County of Fresno, Public Works & Planning Department, Road Maintenance Division at (559) 600-4240. Please see attached documents.

Please be aware that our after-hours contact/staff is only responsible to attend to calls relating to busted water line and sewer connections. While CITIES such as Fresno, Kerman, and Clovis are equipped and have action plans put in place with help from their City resources for these emergencies, Special Districts such as Biola do not have the same direct assistance due to a much smaller scale of resources. We, the Board of Directors, are aware of all that severe weather brings to our community and understand the impact it brings to our homes and families. At this point in time, the best the District can do to serve our community is provide our community with resources such as the ones mentioned above.

For any updates, please visit our website at [www.biolacsd.org](http://www.biolacsd.org). If you have any questions or need additional information, please contact the office at (559) 843-2657.

Best regards,  
Board of Directors  
Biola Community Services District
